*Duration of your ownership of the vehicle

The latest technology is used to give your vehicle the highest level of protection with our Scorpion X-Series CAN Bus Immobiliser.

The immobiliser automatically activates as soon as the ignition is turned off. This **protects against key clone attacks** as a unique custom pin, created via the vehicle's buttons or dash, or a driver tag is needed to disarm the immobiliser and for the ignition to start again.

From vehicle owners to fleet managers, discover how ScorpionTrack can help protect your vehicle and provide a reliable service that is tailored for a better life on the road.

Theft Tracking

Driver Safety

Vehicle Security

Fleet Management

All ScorpionTrack units are **Thatcham Approved** meaning that you could benefit from a reduction in your insurance premiums when disclosed with your provider.

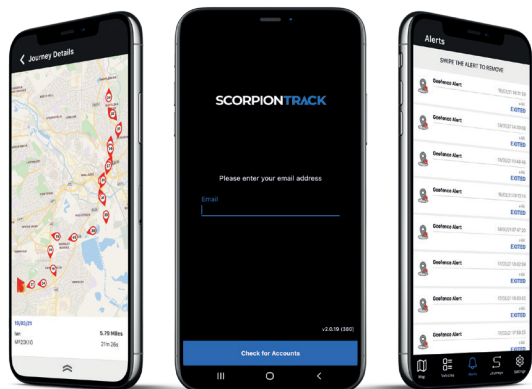

ScorpionTrack S7, S5 and S5+ trackers are **monitored 24/7, all year round**, by our dedicated monitoring team who will liaise with police in the event of theft.

Ultimate accuracy and reliability through GPS, GLONASS and Galileo satellite and GSM technology. Our trackers are also 4g capable, giving you unrivalled global coverage.

Customisable theft alerts such as early warnings based on ignition, GNSS, ADR tag & battery status – plus alerts if the vehicle is towed or moved using a transporter.

The ScorpionTrack desktop and mobile app allows you to **remotely access security, safety and convenience features**.

Manage your journey history, set geofence alerts, view driving behaviour analysis and much more.

A geofence is instantly created around the vehicle when the ignition is turned off and monitors for signs of unauthorised movement.

If unauthorised movement is detected without a driver tag being present, an SMS alert is sent after 6 seconds of continuous movement.

With 24/7 monitoring, our monitoring team will call the owner to confirm the theft and liaise with police to help recover the stolen vehicle.
